

seanCALDER

objective

To work in a creative web development environment and combine this with innovative solutions to suit clients' needs.

experience

- **Senior Interface Developer**
TELUS: February 2007 - Present
I have worked on projects for clients such as Rocky Mountain Vacations, the City of Edmonton, the Port of Vancouver and the 2009 World Police and Fire Games using XHTML, CSS, JavaScript and graphics skills

Sites worked on have included:
www.edmonton.ca/trafficcams
www.2009wpfg.ca
... and a rebuild of Rocky Mountain Vacations' travel booking site.
- **Senior Interface Developer**
Blast Radius: August 2006 - February 2007
I was contracted in to work on projects for clients such as Electronic Arts and Jenny Craig using XHTML, CSS, JavaScript and graphics skills.

Sites completed or worked on were:
www.easports.com/nbalivechallenge/,
www.easports.com/ncaachallenge06/,
www.easports.com/nbalive07/,
www.easportsbig.com/games/nflstreet3/,
www.ea.com/moh/airborne/ and www.easports.com/replay/.
- **Free-lance Web Designer/Developer**
November 1997 - Present
Have acted as a project manager, produced and maintained web sites for clients. Some recent projects can be seen at
www.debraporteous.com, www.studio4.ca, www.practicespace.ca/,
www.ameliaoil.com, www.kaylaa.com.
I also manage HTML email marketing campaigns for various clients.

Some corporate clients have been Habañero
(www.kirschnercameron.com/, and projects for Intrawest, & WCB),
Signals Design Group (www.westernsilvercorp.com/,
www.heartcentre.ca/ & www.healthcare.ubc.ca/MHA_Program/),
Flight Level Media Ltd. (an XHTML-based in-flight presentation),
Communicopia (www.aiesec.ca and www.omnifilm.com) and Tribal
DDB (www.cloroxlaundry.com, www.smartspot.ca/
www.bienchoisir.ca, www.jetzkanada.de & various HTML emails). All
work is cross-browser W3C compliant.

r e s u m e

- **CSS Ninja / Producer**
Ubertor/Combustion Labs Media: December 2005 - December 2006
I was in charge of customizing the looks of client sites using just CSS - the code of each site is the program-generated PHP. CSS was the basis of all my work.
I did some contracting with clients doing their custom sites. I coordinated the design (usually out-sourced) and CSS coding.

Some examples of recent sites are www.raymondgroup.ca, www.iacobucci.ca and www.johnjennings.com.
- **Web Developer / Designer / Project Manager**
BCIT: March 2005 - September 2005
I contracted in as a member of BCIT's web team doing information architecture, XHTML template-building and design. I coordinated and developed school sites, bringing them into the new BCIT site's look and feel (www.bcit.ca) using the Marqui CMS.
- **Autoplan Extranet Developer/Designer**
ICBC: July 2004 - May 2005
I was a member ICBC's Autoplan Extranet development team. This is an extranet used by Autoplan brokers throughout British Columbia as a reference and information tool.
I was brought in on a contractual basis to build the site template and help build the redesigned site for the client.
The template is validated XHTML with extensive use of CSS.
- **Interface Developer**
Blast Radius: August 2003- May 2004
Contract position as a web interface developer. I built web pages from PhotoShop templates. Work done includes utilization of hand-coded HTML/XHTML, Server Side Includes (SSI), Cascading Style Sheets, JavaScript, DHTML, ASP and JSP pages.
Projects I worked on were for BC Hydro, Crystal Decisions, Electronic Arts and Blast Radius' Products Division.
While with the Products Division, I was responsible for the front-end of an XML/JSP-based document collaboration product, Critique.
I was the primary/only XHTML/DHTML coder on the Network Entertainment/Bell Making the Cut sign-up website (www.makingthecut.bell.ca - *version no longer online*); responsible for all image optimization, page templating and bug fixes.
- **Lead Developer/Marketing Director**
Practice Space: November 2003 - May 2005
I am a founding member of a Medical/Dental consulting company. Practice Space uses innovative techniques to help dentists effectively market their practices.
I am responsible for assisting clients in choosing and refining their marketing approaches, whether it is in print brochures, magazine ads or on the web.
Clients so far have been Seawall Dental (www.seawalldental.com) and Seymour Dental Centre (www.seymourdental.com).

r e s u m e

- **Web Developer**
Tribal DDB: May 2002 - August 2003
Full-time position as a web developer. I built web pages from designs done in Fireworks. Work done included utilization of Server Side Includes (SSI), Cascading Style Sheets, JavaScript, ASP and PHP pages. Projects I worked on were for Air Canada (ZIP Airlines - www.4321zip.com), Sun-Rype (www.sunrype.com), The Keg Restaurants (www.kegsteakhouse.com), Clorox (Glad - www.glad.com, www.brita.ca, Hidden Valley, www.softscrub.com, Clorox Bleach (www.cloroxlaundry.com), and Pine-sol - www.pinesol.com), Unilever (Thermasilk, Multibrand, www.lipton.ca, www.knorr.ca, www.homebasics.ca), Jansport, New Ventures BC (www.newventuresbc.com), The Vancouver Vote Yes web site and Caboodles (She She Cosmetics - and C*Me Cosmetics).
- **Webmaster / Designer / Developer**
PMC-Sierra, Inc.: September 2001 - May 2002
I was brought in as a contractor to build HTML pages and templates for the company HR Intranet. This included working with Server Side Includes (SSI), Cascading Style Sheets, JavaScript and Cold Fusion pages.
I completed (Dec. 2001) a redesign/rebuild of their Employee/Manager's Resources Intranet. I designed and built the SSI pages to be both Internet Explorer/Netscape (4 +) compliant. They had not been before.
I redesigned and built their Stock Administration Intranet.
I also redesigned and partially built their corporate, Finance and Facilities Intranets.
Some of the tools used during these projects include Macromedia Dreamweaver, Fireworks and Flash and Adobe PhotoShop.
- **Flash Designer / Programmer**
Chalk Network: November 2001
I was brought in as a contractor to build modules of an online Flash tutorial for Royal Bank Online Banking - www.royalbank.com/oec/.
Tools used were Macromedia Flash and Fireworks.
- **Web Designer / Developer**
Avue Technologies: September 2001 - November 2001
As a contractor, I built JSP pages as templates for the client as part of their Web-based Human Resources management application. This included HTML builds, complex use of Cascading Style Sheets, JavaScript, Quality Assurance testing and Style Guide documentation. Some of the tools used during these projects include Macromedia Dreamweaver and Fireworks and Adobe Photoshop.
- **Web Designer / Project Coordinator - Consultant**
Burntsand Inc.: June 2001 - August 2001
I was brought in as a contractor to build HTML templates and coordinate large corporate web site projects for Burntsand. This included HTML builds, complex use of Cascading Style Sheets, Quality Assurance testing and Style Guide documentation. Some of the tools used during these projects include Macromedia Dreamweaver and Fireworks and Adobe Photoshop.
 - The projects on which I worked were for clients such as **Finning** (Canada, International and their Auction site), **Footstar** (Corporate, Meldisco and Thom McAn web sites) and **KidsFutures**.

r e s u m e

- **Web Designer / Project Coordinator**

Burntsand Inc.: April 2000 - April 2001

I was the creative project coordinator on various projects. This included traveling to the client's site, gathering project requirements and organizing the work of the members of Burntsand's Creative Team throughout the project as well as working on the projects myself.

Some of the tools we used during these projects included Macromedia Dreamweaver, Fireworks and Flash, Adobe Photoshop, Illustrator and Acrobat.

A few of the projects I worked on while I was there were for clients such as:

- **Burntsand** - coordinated the remake of Burntsand's corporate web site (Feb. 2001). I was also responsible for the HTML templates used throughout the site and all the site navigation. Tools used during this project were Dreamweaver, Fireworks, Photoshop, Illustrator JavaScript, Cascading Style Sheets (CSS) and Flash.
- **Slam Dunk Networks** - coordinated the remake of their corporate web site on a very tight deadline (Aug. 2000). Tools used during this project were Dreamweaver, Fireworks, Photoshop, JavaScript and DHTML/Layers.
- **American Chemical Society** - was the project coordinator for a project that included creating a front end to a Documentum-based back-end. Tools used during this project were Dreamweaver, Fireworks, Photoshop, JavaScript and CSS.
- **Methanex** - worked on a customer-based order tracking system for the world's largest methanol producer and marketer. The Creative team created a front-end, which we had to integrate with a JSP-based (WebLogic) back-end. Tools used during this project were Dreamweaver, Fireworks, Photoshop, JavaScript, CSS and working with hand-coded JSP, XML/XSL code.

education

- **PHP** (MDIA 4325) at BCIT
- **ASP** (MDIA 4315) at BCIT
- **April 2000 - Diploma:** Computer Information Systems - Douglas College (with Co-operative Education Designation).
- **September 1999 - Cooperative Education Designation** - Douglas College.
- General studies in science, business and literature.

skills

Applications include:

CMS Systems:

Marqui CMS
Wordpress

Dreamweaver
Fireworks
Flash
Captivate
Contribute
Photoshop
Illustrator
Acrobat

r e s u m e

Browsers:

All the usual suspects.

Languages/Skills

HTML, XHTML, DHTML, CSS, JavaScript, and experience using Server-side Includes (SSI), Flash.

Exposure to:

CGI/Perl, PHP, MySQL, ActionScripting, ASP Java, C/C++, XML/XSL, Visual Basic, JSP and Cold Fusion.

i n t e r e s t s

I have a great interest in design and the web as a whole. It's an exciting medium, which has an almost infinite potential for business, education and artistic expression.

I am a fast learner, enjoy dealing with clients and adapt to new technologies easily.

o t h e r s

Art, literature, wine, computing, movies, road and mountain biking, triathlon, skiing, snowboarding, golf and many other activities.
